SUPER BLAST OFF® FLIGHT DECK CLEANER

The smart and safe way to clean a flight deck

SUPER BLAST OFF® is highly concentrated, requiring less product, and less storage space, which is always a problem on board of aircraft carriers. This makes **SUPER BLAST OFF®** to be the lowest cost-effective product with which to make a cruise, and it is the safest product on the list of approved cleaners since it meets aircraft cleaning specifications.

With **SUPER BLAST OFF®** it is not necessary to take 200 to 300 drums of flight deck cleaner on a MED or WESTPAC cruise. It is not necessary to store your cleaning gear in strategic locations for pick up somewhere during your cruise. Properly used you can make a MED or WESTPAC tour with 150 drums or much less.

SUPER BLAST OFF® will not harm the surface of any aircraft with which it may come in contact. Therefore, it is not necessary to re-spot all aircraft to clean the flight deck. Mixed with fresh or sea water, it will clean the most crucial areas, making landing on a carrier much safer.

SUPER BLAST OFF® will not cause injury to users. There is no more danger in getting **SUPER BLAST OFF®** on your skin or in your eyes than with soap in the shower. However, the directions on the MSDS should be followed for ultimate safety. Any **SUPER BLAST OFF®** left on the skin or clothing should be rinsed off.

With **SUPER BLAST OFF®**, you will avoid a lot environmental problems with governments while overseas or in the United States since it has met environmental standards for the United States and European Economic Community, as well as Japan and Korea.

With **SUPER BLAST OFF®** you have a company and a product you can rely on. The name **BLAST OFF®** has been, and continues to be, the Aviation Boatswain Mate's guarantee of getting the very best. With **SUPER BLAST OFF®** we guarantee you there is no better cleaner available for cleaning a Flight Deck.

SUPER BLAST OFF®:

- is not just a Flight Deck Cleaner, it will clean anything cleanable on your ship.
- will leave no residue on your decks that can be reactivated with a slight rain or mist, creating a slippery deck.
- will not harm any surface not harmed by water.
- will not harm your color stripping.
- will clean your decks clean.
